PROJECTS

DongFang Pay (04/2022 - Present)

- DongFang Pay is a comprehensive payment platform with a Laravel backend and Backpack for developing and maintaining the admin dashboard. This platform is designed to provide a reliable and secure environment for handling transactions.
- Laravel, Backpack
- <https://dfpaymm.com>

Nine Pay (04/2022 - 08/2022)

- Nine Pay is a payment system currently in the development phase. The platform aims to provide a seamless and secure payment experience through a Laravel backend and an Admin Dashboard built with Next.js and React.
- Nextjs, React, Laravel

Moe Hein Gabar Pharmacy (07/2023 - 10/223)

- "Moe Hein Gabar" pharmacy mobile app, contributing to the creation and optimization of the Admin Dashboard using Laravel Backpack. It provided administrators with a centralized hub for managing users, monitoring inventory, processing orders, and accessing real-time analytics.
- Laravel, Backpack
- <https://moeheingabar.com/admin/login>

Housing For All (01/2023 - 05/2023)

- The "Housing For All" estate project stands as a testament to the seamless integration of web, admin, and mobile components, providing a comprehensive solution for property seekers and administrators alike. I played a pivotal role in the end-to-end development of this estate project. I spearheaded the creation of a dynamic web app, an intuitive admin panel, and a seamless API
- Laravel, Bootstrap, JQuery, Backpack

- https://play.google.com/store/apps/details?id=com.housing_for_all.app

Shan Koe Mee Game (08/2022 - 02/2023)

- "Shan Koe Mee" is a Unity card game app for which I leveraged Laravel for API development and authentication, while utilizing React and Inertia for the Admin Panel. Additionally, I integrated Node.js with Socket.io to enable captivating real-time actions within the game.
- Laravel, Inertia, React, Node.js, Socket.io

Photo Upload App

- Next.js, Typescript, Shadcn
